

ISPS Code - Ship Security Personnel or Guards Course

Introduction

Employers of personnel who work on vessels in a security capacity or who have specific security duties according to the vessel's Ship Security Plan (SSP) are required by the International Ship and Port Facility Security Code (ISPS Code) to train their personnel in specific subjects. This course is designed to meet the requirements for training laid out in the ISPS Code for shipboard personnel with specific security duties who work below the level of SSO.

Who Should attend and Entry Level

This course is suitable for employers to train their personnel or for those employed, or seeking to be employed in the maritime industry as ship security personnel or guards. There is no prior training or experience required. However, basic literacy and numeracy are required due to course content & knowledge of the maritime industry would be useful.

Course Content and Duration

The course is run over 1 day and covers:

- ISPS Code background & introduction
- Maritime Security Threats
- ISPS Duties & Responsibilities
- Maritime Security Levels
- The Ship Security Plan
- Suspicious Persons & Behaviour & Circumvention of Security
- Weapons & Explosives
- Practical Protective Measures & Contingency Planning
- Documents, Records, Communications & Confidentiality

Assesment

Candidates will be continually assessed during the delivery of training by the course tutor for their understanding of the subject matter covered.

Qualification

Successful candidates will achieve a Ship Security Personnel certificate issued by Eos Risk Management Ltd.
