

TRAVEL Knight

24/7 Travel Risk Management Platform

Keeping you informed and your staff safe wherever they are in the world

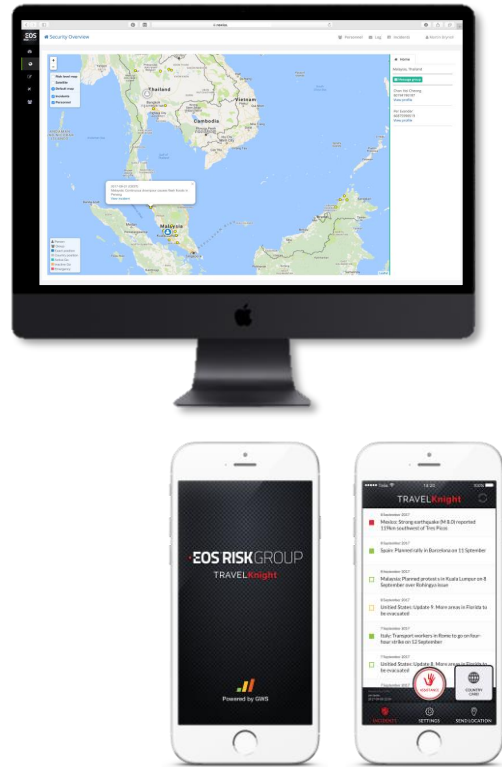

Accounting for all of your people at any one time, in particular your travellers and expatriate employees, is a fundamental duty of care.

Our global traveller tracking platform allows you to monitor your people and assets 24/7 and issue real time alerts of incidents likely to affect business travel.

Our mobile tracking app TRAVEL Knight, delivers a real-time picture of your organisations global footprint.

- TRAVEL Knight sends two types of alerts: for low risk incidents users receive a push notification in-app, and for high risk events an SMS is sent. Our technology keeps pushing alerts through until they are received, no matter where our users are in the world
- EOS Risk uses geo-positioning technology to ensure users receive relevant alerts. No need to update app settings for your next trip, TRAVEL Knight sends alerts based on your location
- In a new country and unsure of the emergency numbers? TRAVEL Knight updates SOS numbers depending on your location
- TRAVEL Knight's static content is available in different languages, and our alerts are sent in English
- Organisations can also add their own information, which is displayed in-app to their users
- Read our pre-departure advice for safety, travel and health before you go
- For operations where security risks are highest, EOS can provide travellers with mobile GSM or satellite tracking devices
- Geo-fences can be constructed to alert the EOS 24/7 Security Operations Centre if any of the tracking devices break pre-defined rules,.

Travellers facing difficulties can call our 24/7 hotline for advice or interact directly with our platform via their PC, tablet or smart phone.

About Us

EOS Risk is a leading global professional security services company, providing a comprehensive range of risk services and solutions in analysis, strategy, operations, travel and emergency assistance.

We help organisations to identify and understand the risks to their business and build business resilience by mitigating and governing those risks.

Our service offering spans a 24/7 end-to-end range of integrated strategic consultancy, expert analysis, audit, combined with security management and operations for both physical and logical security.
